

Set Your Sight on

It's that time of year again to begin thinking and preparing for the OCS County-Wide STEM Fair Event. The event will take place on April 6, 2023, at Livingston Academy. Please help spread the word by sharing this information with your students. Projects can be produced and submitted by individuals, small groups, or classrooms. Projects can be composed of any science related topics. However, the STEM Night Event theme is "Distracted Driving" since April is National Distracted Driving Awareness month. Related themes might include weather, driving challenges (phone usage, texting, audio/radio volume), speeding, etc. Certificates and small prizes will be awarded to winners.

The event is partnered with high school spring parent-teacher conference, family engagement, and rising freshmen night. All district students and families are welcome to engage, view, and gather information. More information will become available as the event nears. We look forward to another night of STEM learning this year!
